July 11, 2025
Director of Human Resources
Deloitte
Beirut

Dear Madam Noura:

Ref: Job Application for Junior Cybersecurity Analyst

I am applying for the position of junior Cybersecurity analyst. The vacancy was advertised on July 2nd, 2025 on LinkedIn.com. The position fits very well with my experience and career interests. My goal is to work in a position devoted to Cybersecurity with a company with diverse clients such as yours.

During my studies in Computer science at BAU, I developed a strong foundation in threat analysis, network security, and ethical hacking. Last year, I created a project where I simulated a phishing attack on a mock corporate network. Using tools like Wireshark and Metasploit, I identified vulnerabilities and implemented firewall rules to mitigate risks resulting in a 98% detection rate. This hands-on experience reinforced my passion for protecting digital assets, a value I know Deloitte prioritizes for its clients. I am very detailed oriented and can comfortably manage multiple tasks at once.

I will be happy to come for an interview to discuss more my skills and interests.

Kind Regards,
Maher Mezher
